

Control Your AI Mind — Source Map

Access date: 2026-06-10

This file is public-safe. Full text, transcripts, screenshots, and raw notes are stored only in the private corpus at `/Users/levuhuy/Documents/AI_Mind_Corpus/control-your-ai-mind/`.

Corpus Status

- Private manifest items after URL dedupe: 168.
- Substack full-text/private items: 138.
- YouTube/video items: 15; transcript status is recorded per item.
- X screenshot leads: 8; authenticated X deep crawl is not completed, so screenshot facts are treated as leads.
- Public repo contains synthesis and links only, not mirrored article bodies or transcripts.

Source Table

Author	URL	Source type	Access status	Theme	Usable modules	Key takeaway	Citation risk	Public/private status
Yiqing Xu and collaborators	StatsClaw	Research/software project	full_text_saved_private	Data and software workflows	M4: Data workflows: folder to figure to database, M7: Verification loops and research O-rings	Agents are strongest when source-to-schema-to-output workflows have validation checks.	Verify before public factual claim.	Private raw; public synthesis only
Yiqing Xu	X screenshot: Yiqing Xu	X screenshot	screenshot_copied_private; authenticated_x_deep_crawl_not_completed	Source atlas / supporting reference	M8: Build your research agent OS	Use as supporting evidence for course framing.	Verify before public factual claim.	Private raw; public synthesis only
Yiqing Xu	Research page and AI reproducibility papers	Researcher website	full_text_saved_private	Source atlas / supporting reference	M8: Build your research agent OS	Use as supporting evidence for course framing.	Verify before public factual claim.	Private raw; public synthesis only
Scott Cunningham	Claude code 52: Journal Cartels and AI Disclosure	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	What a panel of economists said about AI in the production of research	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 50: Claude is Holding On To Its Reasons	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 54: Amnesia	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Episode 11: Why is our number this number?	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Episode 10: Doses and Decompositions!	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Episode 13: Finally the Continuous Diff-in-Diff Estimator Shows Up!	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only

Author	URL	Source type	Access status	Theme	Usable modules	Key takeaway	Citation risk	Public/private status
Scott Cunningham	Claude Code 51: Harnessing AI Agents for Economic Research	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Closing my tabs: the Italian Job	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 53: Applied econometrics will require a detailed checklist	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Is AI Slop saliva or spit?	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Closing tabs from Lake Maggiore in Italy	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Episode 12: What's our causal effect called?	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 49: Video of Kennedy	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 48: What I'm learning from giving four AI talks in two weeks	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 47: Many Agent Frameworks for Skills	Substack post	full_text_saved_private	Econometric verification	M3: Task contracts for research agents, M6: Skills, memory, and reusable methods, M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Episode 9: Mystery Solved!	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 46: Verification is the new bottleneck	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 45: AI Agents and the Minimum Wage	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Episode 8: Poisson Regressions (Finally)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only

Author	URL	Source type	Access status	Theme	Usable modules	Key takeaway	Citation risk	Public/private status
Scott Cunningham	Claude Code 44: My four criteria for using Agents, with an application to referee reports	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Episode 7 of the Odd Couple: Human Verification, I mean, Hannah Verification!	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	A professor's use case for AI generated papers	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Episode 6 of the Odd Couple: How Will We Draw Our Diff-in-Diff?	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 41: Updating my workflow and skills	Substack post	full_text_saved_private	Econometric verification	M3: Task contracts for research agents, M6: Skills, memory, and reusable methods, M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Learning Continuous Diff-in-Diff with Claude Code: Deriving the TWFE Weights (Part 1)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 39: Claude Code, Applied Econometrics and Learning Continuous DiD	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Episode 5 of the Odd Couple: Making Maps with Claude Code!	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 38: A Plug for Paul Goldsmith-Pinkham's Markus Academy Series	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 37: Building an Understanding of Rounding for the Purposes of Publishing and Evidence for P-Hacking	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	The Odd Couple Episode 4: Introducing Hannah	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 36: I Was Wrong About P-Hacking (And Here's What I Actually Found)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only

Author	URL	Source type	Access status	Theme	Usable modules	Key takeaway	Citation risk	Public/private status
Scott Cunningham	Explainer of Ludwig, Mullainathan and Rambachan's 2026 Econometrics of LLM Paper	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	The Odd Couple Season 5 Episode 3: What's up with this data?	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 34: Using "Dispatch" on my phone with Claude Code to revisit the cannabis paper, plus other stuff about CS	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 33: Help Claude Help Us By Continue Learning	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	The Odd Couple Season 5, Episode 2: Setting it up and getting the data	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 32: A Modest Proposal for Editors	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 31: Apple-to-Apple Audit of Six Callaway and Sant'Anna packages	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 30: Hadn't the Satisfaction Always Been in the Discovering Not the Discoveries?	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	The Mixtape with Scott (Featuring Caitlin Myers) Season 5: Episode 1 of The Odd Couple!	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 29: Can Claude Code Find Facts? And If So, Should I Believe Them?	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 28: Multiple Agents Auditing Your Callaway and Sant'Anna Diff-in-Diff (Part 3)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 27: Research and Publishing Are Now Two Different Things	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 26: Multiple Agents Auditing Your Callaway and Sant'Anna Diff-in-Diff (Part 2)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only

Scott Cunningham	Claude Code 25: More Autonomous Agents Are Coming to Research	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 24: Multiple Agents Auditing Your Diff-in-Diff Code (Part 1)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Closing tabs: Tuesday edition	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 23: W. Edward Deming and The Zero Error Philosophy For Your Workflow	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Closing tabs: Saturday Morning Edition	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 22: Final Entry Into Classification of Speeches with Claude Code and OpenAI gpt-4o-mini (Part 5)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 21: Attention, Human Verification and Congestion, or Some Problems From Too Much Better Work	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 20: Faculty Adoption of AI, Decks and Folders, and Non-Trivial Security Risks	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Codechella Madrid Week 2: New Material and Claude Code	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 19: When the Reclassification Is Massive But the Trends Don't Change, Something Interesting Is Happening (Part 4)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 18: When the Reclassification Is Massive But the Trends Don't Change, Something Interesting Is Happening	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 17: The Zero Profit Condition Is Coming	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only

Author	URL	Source type	Access status	Theme	Usable modules	Key takeaway	Citation risk	Public/private status
Scott Cunningham	Claude Code 16: The Memory Foam Mattress Theory of Claude Code	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Closing tabs: the Saturday edition	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code 15: The Results Are In: Can LLMs Replicate a PNAS Paper? (Part 2)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code Part 14: I Asked Claude to Replicate a PNAS Paper Using OpenAI's Batch API. Here's What Happened (Part 1)	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code Part 13: Skills and the Split-PDF Workflow	Substack post	full_text_saved_private	Econometric verification	M3: Task contracts for research agents, M6: Skills, memory, and reusable methods, M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code Part 12: How I Use Claude Code for Empirical Research	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code part 11: use this prompt to make a deck	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code Series (part 10): Producing Highly Effective Decks for My Data Science Class	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code Series (part 9): creating .bib files and automating article retrieval	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code Series (part 8): Resurrecting and Extending an Old Abortion Paper Towards Using Continuous Diff-in-Diff	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code Series (part 7): Making Beautiful Decks For My Future Self	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
Scott Cunningham	Claude Code Series part 6: Video Explainer of Claude Code in Action	Substack post	full_text_saved_private	Econometric verification	M7: Verification loops and research O-rings	Causal workflows need explicit checks for unit, timing, estimand, FE, clustering, and robustness.	Do not mirror full text; cite/link and paraphrase.	Private raw; public synthesis only
